

## **Caernarvon Track Trip Bunkers conservation reserve**

**Left home at 7.15 am to arrive at Dublin road house, where I met Phil and Mags at about 9am we left about 9.30 approx, and arrived at Bunkers Reserve 2.30 pm. We set up our tents and swag's got a fire started. checked out the facility's, it had flushing toilets and hot showers via a donkey boiler, a great camp kitchen with everything in it. And had a good evening around the fire and it was needed because it windy and cold. The following morning we went to see the ranger and we were given Track notes witch were very comprehensive with lots of info about the track, what you, ll see at posted locations. The notes also had info about its history of the property. We started the track about 10am. It was very beautiful and eye catching, picture opportunities every where especially when the sun came out as it was a little cloudy. Driving was challenging in some spots but excellent four wheel driving. The place was really green looks like they had a fair bit of rain. They had 2 spots along the track with benches and Long drops so you could rest along the way. After**

**lunch it just got better and better definitely worth the drive to get there. We got back to camp lit the fire had some nibbles, and it was beer o'clock, great evening around the fire chatted for a while, and fixed the world, good to get to bed after a long day. Sunday morning we packed up and headed home for Phil and I ,But Mags went on his own to do the Bridal track and visit some mates too. I got home about 4pm a bit tired but happy and had terrific weekend with Phil and Mags. Yours In 4wd Chris**
